PVC Floating Floor Tiles

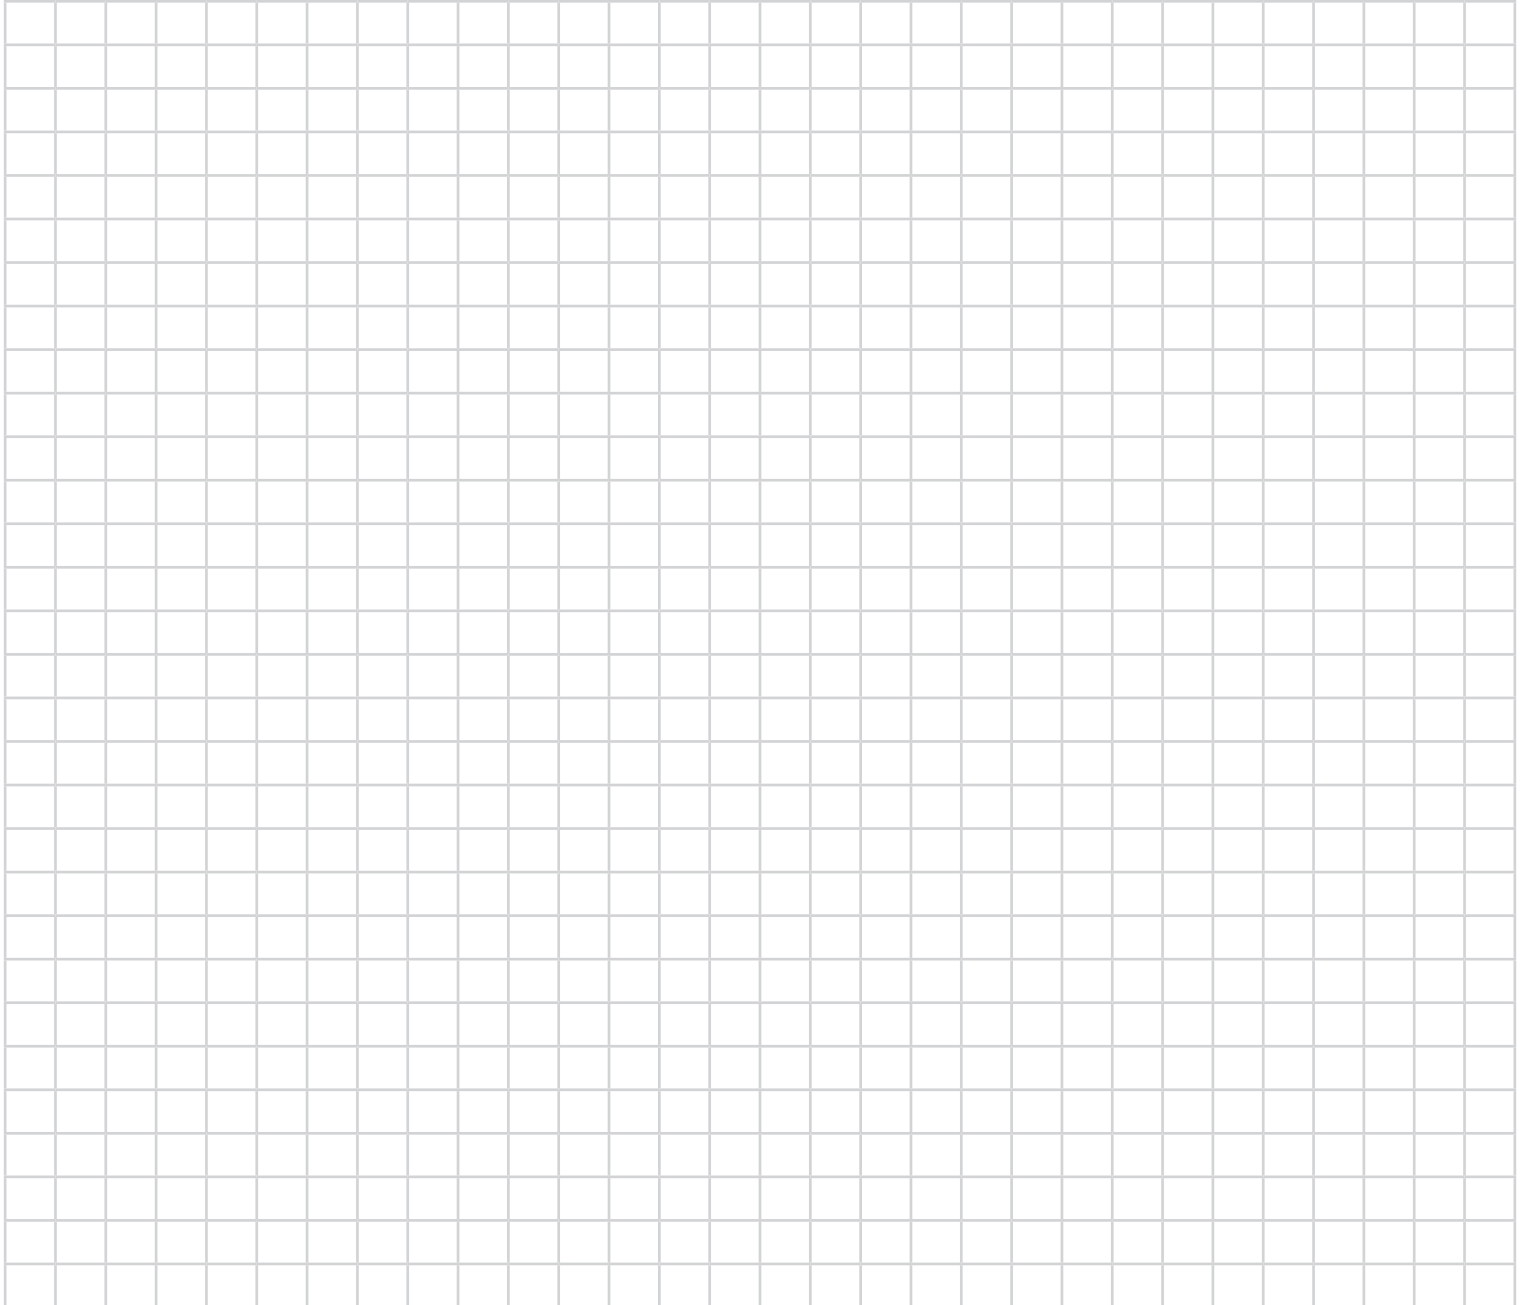

- Simple to clean with warm soapy water
- Non slip chequer plate design (stock)
- Optional colours to create custom designs and layouts
- Structurally designed for high loads
- Ideal for garage, workshop and showroom
- Edging and corner strips to complete the design
- Easy to install requiring no glues, adhesives or tapes
- Each tile 300x300x7mm

When designing the layout for the floor make sure that you consider the maximum areas to cover and accurately calculate the quantities required. Each tile is 300x300mm (30x30cm).

For a floor 6m x 5.8m you would require 400 tiles...

6000mm / 300mm tiles = 20 tiles
 5800mm / 300mm tiles = 19.33 tiles (round up to 20 tiles)
 20 x 20 tiles = **Total 400**

DESIGN....Simply draw your garage area and colour in to suit your design.
